

South of Powell/Triangle				
Utilize shared parking of parking lots at big-box stores (e.g., Target and CVS).	Residents	Recommendations do not address shared parking. Metering and permitting of adjacent streets may increase demand for these off-street lots.		N
Implement parking management and increase enforcement along Park Avenue for visitors during the weekday work hours to increase turnover.	Residents	Recommendations for mid-term metered parking along Park Avenue.		Y
GoBike bike share infrastructure reduces the number of parking spaces.	Residents and Businesses	Bike share is expected to bring more users to a site than at the same amount of space used for vehicle storage due to the efficiency of space use. Bike share locations are delineated in the plan (as No Parking) and eliminate approximately 40 parking spaces citywide. Bike Share is treated no differently than bus stops and loading zones in terms of limiting parking controls. The City has sought a grant for assessing the highest and best use of curb to inform such trade-offs.		N
Restrict parking of RV vehicles behind Target and within the Target parking lot.	Residents	Parking regulations for RV vehicles include a 72 hour restriction on parking and wellness checks on vehicle occupants after 72 hours, if occupied. Plan makes no recommendation for off street parking.		N
Provide parking options for the Senior Center that are convenient and safe.	Residents	Recommendation for short-term metered parking along San Pablo Avenue near the Senior Center. Consider increasing handicapped parking adjacent to the Senior Center.		N
Designate permit parking near the school.	Residents	Recommendation for the Triangle Permit Area around the school area.		Y
Oakland (Vallejo Street)				
Oakland (Vallejo Street)	Residents	North Hollis/Doyle Permit Area applies only to the Emeryville (west) side of Vallejo Street. Recommendations do not address coordination with Oakland to extend RPP to the Oakland (east) side of Vallejo Street.		N
